

Our next generation portfolio

We've introduced faster and smarter ways to protect homes and businesses.

Essential

Our new and affordable, wireless alarm signalling that works for you.

Advanced

Dual-path alarm signalling for medium risk sites. With the flexibility to upgrade when it matters most.

Ultimate

Our best, most responsive system yet. With private IP and resilient 4G signalling for an uncompromised connection.

BT Redcare products installed and maintained by Guardian Alarms Ltd.

Guardian Alarms is accredited by the National Security Inspectorate (NSI) and all our alarm systems are installed to NSI Gold standards and issued with a NACOSS Gold certificate.

FOUNDED 1980

Redcare Essential

Fast. Smart. Affordable.

With Essential, you get simple, affordable, wireless alarm signalling. It comes with a SIM card that switches between the main UK mobile networks, so you always get the best connection. And it's monitored by experts that keep an eye on your property day and night. All year round.

Why choose Essential?

Gives you monitored protection

for your home or business without costing the earth.

Comes with mobile signalling

which is great if you don't have a landline.

Uses less power and comes in recyclable packaging

it's great news for the environment and your utility bills.

Redcare Advanced

A flexible way to protect your home or business

Advanced gives you home and business alarm signalling that can change with your needs. It comes with two signalling paths for twice the reassurance.

And it's monitored by experts that keep an eye on your property day and night. So if something triggers your alarm they'll know about it. Fast.

Why choose Advanced?

Double the reassurance

with both an IP connection and two 4G SIMS, we've got you covered. No matter what.

Along with fire and security signalling

we also cover things like gas and water monitoring.

Uses less power and comes in recyclable packaging

it's great news for the environment and your utility bills.

Redcare Ultimate

Our best, most responsive system yet

With Ultimate, you'll get our best alarm signalling system yet – for every level of risk. It uses a private IP connection on our network and comes with a backup, powered by two 4G SIMs.

There's battery backup in the alarm panel to keep things running, even in a power cut. And if that's not enough, enhanced monitoring means experts will know about any problems with your connection in just 90 seconds.

Why choose Ultimate?

Reliable and secure

with both an IP connection and two 4G SIMS, we've got you covered. No matter what.

Fast mobile connection

Ultimate's mobile connection reports just as fast as its private IP connection, so you'll get the same solid protection, no matter what.

As well as signalling for fire and security

you can get an extra layer of protection with alerts for things like gas leaks and floods.
